

### Job Post: Splice Tech

Proline Telecommunication Construction, LLC is currently seeking a Fiber Splicer who will play a vital role in ensuring timely delivery and quality of telecommunications services to our customers. You will read and interpret schematics and diagrams to splice, terminate, and test fiber-optic cable for new construction and service installations. The role also maintains, troubleshoots, and repairs damaged cable and related issues in the outside plant network.

### Qualifications

- Good communication and organizational skills
- Highly independent, self-starter, responsible and attentive to detail
- Mechanically inclined
- Ability to work aloft up to 40' in a bucket truck, ladder, and/or climb utility poles
- Understand construction prints and splice schematics
- Proficient with MS Office and similar programs
- Must be able to pass background and drug screening
- Must hold a valid driver's license
- This job will include approximately 75% travel
- Overtime outside of normal workday hours may be required
- Able and willing to be on call 24 hours, travel, and work nights/weekends
- Able and willing to work outdoors and in inclement weather conditions

### Responsibilities

- You will read and interpret schematics and diagrams to splice, terminate, and test fiber-optic cables for new construction and service installations
- The role also maintains, troubleshoots, and repairs damaged cable and related issues in the outside plant network
- Splice and repair fiber optic cables using single and mass fusion equipment (Loose tube/Ribbon)
- Terminate fiber with pig tails or Unicam components
- Test fiber using Optical Time Domain (OTDR) or power meter and light source, testing with a light identifier
- Install required splice cases and hardware
- Maintain existing plant without causing signal failure interruptions

- Maintain test documentation
- Maintain project tracking information (production sheets, time sheets, and customer required paperwork)
- Maintain Testing, Splice equipment, trailers, and vehicles
- Keep a safe working environment
- Proficient in the use of all test and splicing equipment

### Benefits

- We offer a comprehensive benefit package, competitive pay, flexibility, paid on the job training, overtime, professional development, and inspire you to be bold, yet accountable
- Safety training and classroom safety instruction
- Paid vacation, sick time, and holidays
- Health, Dental and Vision insurance
- 401(K) after 6 months
- Life insurance

### Time requirement

- This job will include approximately 75% travel
- Overtime outside of normal workday hours may be required
- Able and willing to be on call 24 hours, travel, and work nights/weekends for emergency restoration
- Able and willing to work outdoors and in inclement weather conditions
